**DETAILED ACTION**

***Election/Restrictions***

1. Claims 1-50 are pending in the application
2. Claims 5, 8, 15, 20, 24, 30, 40, and 46 have been withdrawn from consideration.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 29, 31-39, 41-45, and 47-50 drawn to an aircraft and method of designing, classified in class 244, subclass 214.
  - II. Claims 6, 7, 9, 10, 21-23 and 25-29, drawn to aircraft and related method for sizing, classified in class 244, subclass 214.
  - III. Claims 11-14 and 16-19, drawn to a method for sizing an aircraft system, classified in class 244, subclass 214.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as selecting a taper for a leading edge of an airfoil. See MPEP § 806.05(d).
5. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as sizing the leading edge chord length to match the distribution of angles of attack. See MPEP § 806.05(d).

6. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 6 has separate utility such as sizing an aircraft system by selecting a leading edge device chord length based on taper. See MPEP § 806.05(d).

7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.
